## Building Permit Application

### Building Permits

The cost of a building permit is based on the value of the work being done. The value is determined by a number of factors, including, in particular, the occupancy group and type of construction.

For residential construction, the value is solely calculated by taking the heated and cooled square footage and multiplying that number by the “square foot construction cost” as determined by the International Code Council building valuation table.

For commercial projects, the permit cost is calculated based on the MPC “Materials Purchase Certificate” amount; however, if an MPC cannot be provided than the building valuation will kick in to determine the construction value.

Once the value has been determined, the following chart is used to calculate the total permit cost:

\$1,000.00 or less:	\$50.00
\$1,000.00 to \$49,999.00	
For the first \$1,000.00	\$50.00
For each additional \$1,000.00 add	\$5.00
\$50,000.00 to \$99,999.00	
For the first \$50,000.00	\$360.00
For each additional \$1,000.00 add	\$4.00
\$100,000.00 to \$499,999.00	
For the first \$100,000.00	\$650.00
For each additional \$1,000.00 add	\$3.00
\$500,000.00 and up	
For the first \$500,000.00	\$1,780.00
For each additional \$1,000.00 add	\$2.00
